Phase 3 — Journal

TipTap rich text editor, mood tracking (1–5), tags, calendar view, PIN lock with session-only unlock.

✓ Complete

RICH TEXT EDITOR (TIPTAP)

- StarterKit: bold, italic, headings, lists, blockquote, code
- Placeholder extension — "Write anything..."
- Character count display
- Auto-save on keystroke (500ms debounce)
- Dynamic import (no SSR) to avoid hydration issues

MOOD TRACKING

- 5-point scale: 😔 Rough → 😄 Great
- Visual emoji picker in editor toolbar
- Average mood shown in analytics
- Mood-colored dots on journal calendar
- Month filter: entries + mood shown together

PIN LOCK

- Argon2id hashed PIN stored in User table
- Lock/unlock per entry (not global)
- Session-only: `revealed` state (not persisted)
- 5 failed attempts → entry content erased permanently
- Locked entries show blurred placeholder until unlocked
- PIN change/remove flow in Settings → Journal tab

ORGANIZATION

- Tags: comma-separated, filterable sidebar chips
- Full-text search across title + content
- Month/year navigation
- Calendar view: mood-colored day dots
- List view: sorted by most recent
- Entry date separate from created/updated timestamps

API Routes

GET	`/api/journal`	List entries for month/year with search + tag filter
POST	`/api/journal`	Create new journal entry (blank draft)
GET	`/api/journal/[id]`	Get single entry (checks PIN lock state)
PATCH	`/api/journal/[id]`	Auto-save: title, content, mood, tags, locked

DEL	/api/journal/[id]	Delete entry permanently
GET	/api/journal/calendar	Get dates + moods for calendar month view
GET	/api/journal/tags	Get all unique tags for current user
POST	/api/journal/pin	Set or remove journal PIN (Argon2id)
POST	/api/journal/[id]/unlock	Verify PIN and mark entry revealed (session only)
