Phase 6 — Notes

Full CRUD notes module with two-pane editor, color themes, tags, pin, auto-save, and full-text search.

✓ Complete

TWO-PANE LAYOUT

- Left sidebar: note list with search, tag filter chips
- Right pane: full editor with toolbar
- Empty state: create-first-note prompt
- Note count in sidebar footer
- Height: `calc(100vh - 4rem)` with overflow hidden

AUTO-SAVE

- Title, content, and tags auto-save on every keystroke
- 800ms debounce (saveTimer ref)
- "Auto-saved" status indicator in toolbar
- New notes require explicit "Create Note" click
- After creation, switches to edit mode (auto-save enabled)

COLOR THEMES

- 6 color options: default, indigo, emerald, amber, rose, purple
- Color affects background + border of editor pane
- Color dot shown in sidebar list for colored notes
- Circle color picker in editor toolbar
- Auto-saved on color change

TAGS & SEARCH

- Comma-separated tag input, blur triggers save
- Tag filter chips in sidebar (All + per-tag buttons)
- Full-text search: title + content (iLike)
- 300ms debounced search re-fetch
- Search + tag filter can combine
- All tags shown dynamically from current note set

PIN NOTES

- 📌 Pin button in editor toolbar
- Pinned notes sort to top of list
- Pin icon shown in sidebar list item
- Toggle: pin → unpin on same click
- Auto-saved immediately on toggle

DATABASE SCHEMA

- `Note` model: id, userId, title, content (Text), tags (String[]), pinned (Boolean), color (String?)
- Indexes: userId, (userId + pinned)
- Order: pinned DESC, updatedAt DESC

- Cascade delete when user deleted

API Routes

GET	/api/notes	List notes ordered by pinned→updatedAt; supports ?q= search and ?tag= filter
POST	/api/notes	Create new note with title, content, tags, pinned, color
GET	/api/notes/[id]	Get single note (ownership verified)
PATCH	/api/notes/[id]	Update any fields: title, content, tags, pinned, color
DEL	/api/notes/[id]	Delete note (ownership verified before delete)

Sidebar List Item

Each note in the sidebar shows:

- Color dot (if colored) + 📌 pin icon (if pinned)
- Title (truncated to one line)
- Content preview (2-line clamp, "Empty note" if blank)
- Relative timestamp (just now / Xm / Xh / Xd / date)
- First 2 tags as mini chips
